

## Thomas Claussen

Riverview should be granted the permit for expansion. Riverview LLP facilities have had a positive impact on agriculture and the community. They provide another outlet for marketing our crops and we are able to utilize the manure as a great sustainable fertilizer for our growing crops. Their employees have children in our school systems and they are involved in volunteering at community and school events. The sites that Riverview operates are among the cleanest livestock farms that you can find in the country. Having a business in our communities that is willing to invest and grow is a great opportunity that we should not ignore. Their farms have helped increase tax receipts at the local and county level that help government budgets.
