Re: Phase I Environmental Site Assessment
MTL Addition Development
North of 11771 Troy Lane North, PID: 3012022340001
Dayton, Minnesota

Dear Mr. Master:

In accordance with your written authorization, Braun Intertec Corporation conducted a Phase I Environmental Site Assessment (ESA) of the above-referenced property (Site). The objective of the Phase I ESA was to identify recognized environmental conditions in connection with the Site and to assist in satisfying All Appropriate Inquiries (AAI) standards and practices. The Phase I ESA was conducted in general conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-21 and 40 Code of Federal Regulations (CFR) Part 312.

The Phase I ESA was prepared on behalf of, and for sole use by, Master Real Estate 2, LLC (Client) unless otherwise specified in Section 1.3 of the attached report. Please refer to the report for the scope, methods, and conclusions of our assessment.

We appreciate the opportunity to provide professional services to you for this project. If you have any questions regarding the attached report, please contact Michael Carter at 612.219.6594 or Mark Ciampone at 612.210.6147.

Sincerely,

BRAUN INTERTEC CORPORATION

J. Michael Carter
Environmental Scientist

Executive Summary

Braun Intertec Corporation conducted a Phase I Environmental Site Assessment (ESA) of the property located northeast of 11771 Troy Lane North, PID: 3012022340001 in Dayton, Minnesota (Subject Property, hereafter referred to as Site) in general conformance with the scope and limitations of ASTM International (ASTM) Practice E1527-21 and 40 Code of Federal Regulations (CFR) Part 312.

At the time of this assessment, the Site consisted of one parcel (PID: 3012022340001) totaling 44.62 acres. The majority of the Site was developed as cultivated agricultural land. Wooded, low-lying areas were present on the northern and southwestern portions of the Site. Standing/surficial water was also observed from snowmelt and wet conditions at the time of the Site reconnaissance on the southern portion of the Site.

There were no other apparent past uses evident from observations during the Site reconnaissance.

Based on the readily available historical information, the Site has been predominately used as agricultural land since at least 1937 and has been used as such up to the present. The eastern edge of the Site has been a low lying/wetland area since at least 1937 and additional low-lying/wetland areas become evident at the Site starting in 1994.

The surrounding area was largely undeveloped at the time of the earliest historical sources (1937 through 1960), with the exception of the current location of Sovereign Stables (French Lake Equestrian) property that can be seen on the adjoining property to the northeast of the Site. The current alignment of French Lake Road borders the Site to the northeast. Small structures associated with the current location of the Dayton Park (trailer park) can be seen bordering the Site to the west in 1966. In 1994, industrial or commercial-sized structures can be seen on the adjoining properties to the south of the Site associated with the current location of JE Dunn Construction and Codema (engineering firm). Paved parking areas and outdoor storage for these structures can also be seen to the south of the Site. A cul-de-sac associated with the current alignment of Troy Lane North can be seen to the south of the Site, splitting, or bisecting both JE Dunn Construction and Codema (engineering firm) properties beginning in 2012.

No obvious indications of environmental concerns were noted on adjoining or nearby properties at the time of the reconnaissance.

This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the Site.

1.0 Introduction

Braun Intertec conducted a Phase I Environmental Site Assessment (ESA) of the MTL Addition Development property located northeast of 11771 Troy Lane North, PID: 3012022340001 in Dayton, Minnesota (Subject Property, hereafter referred to as Site). The Site is 44.62 acres in size and used predominantly for cultivated agricultural purposes. Trees and other vegetation are located along the northern Site boundary and in the southwest corner of the Site.

1.1 Purpose

The U.S. Environmental Protection Agency (EPA) All Appropriate Inquiry (AAI) rule allows a user to qualify for certain protections from CERCLA liability for innocent landowners, bona fide prospective purchasers, and contiguous property owners in that it constitutes all appropriate inquiry into prior ownership and use of a property prior to or on the date of property acquisition. The purpose of this Phase I ESA was to identify, to the extent feasible pursuant to the processes defined by ASTM International (ASTM) Standard Practice E1527-21 (ASTM E1527-21), recognized environmental conditions in connection with the Site and to assist in satisfying All Appropriate Inquiries (AAI) standards and practices. Definitions of common terms associated with ASTM 1527-21 are presented in Appendix A.

A recognized environmental condition (REC) is defined by ASTM E1527-21 as “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.” For the purposes of this definition, “likely” is that which is neither certain nor proved but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein.

A REC may include a *controlled recognized environmental condition (CREC)* which is defined by ASTM E1527-21 as “a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).”

A historical recognized environmental condition (HREC) is defined by ASTM E1527-21 as “ a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.”

1.2 Scope of Services

The Phase I ESA was conducted in general conformance with the scope and limitations of ASTM E1527-21 and 40 Code of Federal Regulations (CFR) Part 312. Generally, this scope of services as defined by ASTM E1527-21 included the following.

- Searches for recorded environmental cleanup liens (a User Responsibility).
- Reviews of federal, tribal, state, and local government records.
- A review of readily available historical information; interviews with owners, operators, and occupants (as available).
- Visual reconnaissance of the Site and of adjoining properties.
- Preparation of this report.

1.3 Use of Report

According to the User, the Phase I ESA was conducted in association with the redevelopment of the Site.

The Phase I ESA was prepared on behalf of, and for use by, Master Real Estate 2 LLC (User) in accordance with the contract between Master Real Estate 2 LLC (Client) and Braun Intertec, including the Braun Intertec General Conditions or specific contractual terms agreed between parties. No other party has a right to rely on the contents of the Phase I ESA without written authorization by Braun Intertec. All authorized parties are entitled to rely on the report according to our contract with Client, and under the same terms, conditions, and circumstances. Please note that our contract with Client may contain a limitation of our total liability. If so, such limitation also applies to all those receiving this permission.

1.4 Limitations, Significant Assumptions, and Exceptions

The scope of work defined by the ASTM E1527-21 is not intended to provide a universal analysis of potential environmental risks and hazards. A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Braun Intertec used that degree of care and skill ordinarily exercised under similar circumstances by reputable members of its profession currently practicing in the same locality. No warranty, express or implied, is made.

This Phase I ESA included no evaluation of non-ASTM scope considerations such as those listed in ASTM E1527-21, Section 13.1 unless otherwise addressed in this report. These include, but are not limited to, asbestos-containing materials (ACM), radon, indoor air quality, mold or microbial growth conditions, lead-based paint (LBP), lead in drinking water, or wetlands. A complete evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that addressed by this scope of work. Vapor migration in the subsurface is described by ASTM E2600; however, ASTM E1527-21 does not require application of the E2600 standard to achieve compliance with all appropriate inquiries. An ASTM E2600-15 vapor encroachment screen is not within the scope of this Phase I ESA and will not be conducted unless specifically requested by the User. However, vapors present or likely present from hazardous substances or petroleum products are considered no differently than hazardous substances or petroleum products present or likely present as a result of a release to the environment. The determination of whether a REC related to vapor encroachment actually exists may require additional information or evaluation that is beyond the scope of a Phase I ESA.

Observations made regarding the layout of the Site and surrounding properties were true at the time of this assessment. Although these features are described using present tense, many described features are not permanent and may change over time.

No significant assumptions were made for this assessment. The findings of this Phase I ESA are based solely upon evaluation of information from the sources referenced within this report. The information obtained from records review is limited to that which is reasonably ascertainable, as defined by ASTM E1527-21. Information obtained from businesses or individuals is limited to that which is voluntarily disclosed. The identification of conditions that could affect the Site may be limited by the availability and accuracy of information provided by governmental and private sources. To the extent practical, the accuracy of information obtained has been verified. The information presented in this report is based upon records that are currently available and upon the conditions that existed at the time of our visual reconnaissance of the Site. Limiting conditions, if any, present at the time observations of the Site were made are detailed in Section 5.1.

1.5 Viability

Subject to Section 4.6 (*Continued Viability of ESA*) and Section 6 (*User's Responsibilities*) of ASTM E1527-21, an environmental site assessment meeting or exceeding this practice and for which the information was collected or updated within 1 year prior to the date of acquisition of the Site may be used provided that the following components of the inquiries were updated within 180 days of the date of purchase or the date of the intended transaction:

- Interviews with owners, operators, and occupants;
- Searches for recorded environmental cleanup liens (a User Responsibility);
- Reviews of federal, tribal, state, and local government records;
- Visual reconnaissance of the Site and of adjoining properties; and
- The declaration by the environmental professional (EP) responsible for the assessment or update.

The 180-day period shall commence from the completion of any of these components, whichever is first.

The dates of the referenced components for this ESA are provided below.

Required ESA Components	Date Completed
Earliest date of interview of past and present owners, occupants, or operators	May 11, 2023
Date of Environmental Lien Search or Title Commitment (if provided)	Not provided
Reviews of federal, tribal, state, and local government records	May 2, 2023
Date of visual reconnaissance of subject and adjoining properties	May 10, 2023
EP declaration/Phase I ESA Report Issuance Date	May 18, 2023

2.0 User Provided Information

The purpose of this section is to describe tasks to be performed by the "User." The "User" as defined by ASTM E1527-21, is "the party seeking to use Practice E1527 to complete an environmental site assessment of the subject property." A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager."

Statute 40 CFR 312 allows (but does not mandate) the User performing AAI to conduct inquiries or activities that may include searches for environmental liens, assessments of any specialized knowledge on the part of the User, an assessment of commonly known or reasonably ascertainable information about the Site, and an assessment of the relationship of the purchase price to fair market value. However, if the User performing AAI conducts one or more of these inquiries and/or activities, the rule allows (but does not mandate) that the User may communicate information gathered from these inquiries and/or activities to their Environmental Professional (EP) to identify a possible REC.

Braun Intertec provided a User Questionnaire to the Client to communicate information gathered from these inquiries and/or activities to the EP (Appendix B). As indicated in our contract, if multiple Users are requesting reliance on the Phase I ESA, the Client was responsible for forwarding a copy of the questionnaire to all appropriate entities (collectively the User). User-supplied information, if received, is discussed in the following sections.

2.1 Environmental Liens

An environmental lien is a charge, security, or encumbrance, upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property.

The User was not aware of a record of environmental liens recorded against the Site.

2.2 Activity and Use Limitations

Activity and Use Limitations (AULs) are legal or physical restrictions or limitations on the use of, or access to, a site or facility intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances or petroleum products in environmental media.

The User was not aware of the presence of AULs recorded against the Site.

2.3 Specialized Knowledge

Specialized environmental knowledge includes any information and/or experience related to the Site or nearby properties that is material to identifying RECs in connection with the Site.

The User did not have specialized knowledge or experience regarding the Site or nearby properties.

2.4 Valuation Reduction for Environmental Issues

Valuation reduction for environmental issues includes the relationship of the purchase price to the fair market value of the property.

The User was not aware of information indicating any reduction in purchase price or fair market value due to environmental issues.

2.5 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information includes information about the Site that is generally known to the public within the local community where the Site is located, and that is material to the identification of RECs in connection with the Site.

The User stated the Site has been used as farmland to grow corn.

2.6 Degree of Obviousness

The User must consider the degree of obviousness of the presence or likely presence of releases or threatened releases at the Site and the ability to detect releases or threatened releases by appropriate investigation.

The User was not aware of any obvious indications of the presence or likely presence of releases or threatened releases at the Site.

2.7 Other

No other information was provided by the User.

3.0 Site Location and Description

Site information was obtained from User-provided information, observations during the Site reconnaissance, and from a review of readily available documents and online information sources.

3.1 Site Location

A Site Location Map is attached as Figure 1. Information regarding the Site obtained from the county website is attached in Appendix C. Relevant Site information obtained from the county website and from other sources is summarized below.

Address:	Not assigned
City:	Dayton
County:	Hennepin
State:	Minnesota
Property Identification Number:	3012022340001
Construction Year:	Not available
Owner:	Master Real Estate 2 LLC
Latitude:	45.169 North
Longitude:	-93.411 West
Size:	44.62 acres

3.2 Site Description and Use

At the time of this assessment, the Site consisted of one parcel (PID: 3012022340001) totaling 44.62 acres. The majority of the Site was developed as cultivated agricultural land. Wooded, low-lying areas were present on the northern and southwestern portions of the Site. Standing/surficial water was also observed from snowmelt and wet conditions at the time of the Site reconnaissance on the southern portion of the Site. A Site Layout Plan is attached as Figure 2.

3.3 Current Uses of the Adjoining Properties

Direction	Property Use
North	Wooded and grassy areas with West French Lake Road and French Lake located beyond
South	JE Dunn Construction and Codema (engineering firm) with commercial properties located beyond
East	West French Lake Road with Sovereign Stables and Boarding (French Lake Equestrian) and residential/homesteads with residential/homesteads and grassy areas located beyond
West	Dayton Park (trailer park homes) with commercial properties located beyond

No obvious indications of environmental concern were noted on adjoining properties at the time of the reconnaissance. Adjoining properties are depicted on Figure 2.

4.0 Records Review

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the Site. References identifying published sources and Client- or User-provided reports relied upon in preparation of this Phase I ESA are provided in Appendix D.

4.1 Physical Setting

The purpose of the physical setting review is to provide information about the physical setting of the Site in order to aid in the evaluation of both physical characteristics of the Site and additional attribute data, which is useful in assessing the impact of migration of contaminants and subsequent impact on soils and/or groundwater.

4.1.1 Topography

Surface elevations at the Site range from approximately 935 feet above mean sea level on the western portion of the Site, to 905 feet above mean sea level on the eastern portion of the Site, according to the United States Geologic Survey (USGS) 7.5-minute quadrangle for Dayton, MN. The Site generally slopes to the east and northeast toward French Lake located 0.20 miles to the northeast away from the Site.

4.1.2 Geology

The unconsolidated sediments in the Site vicinity are Pleistocene age loamy till deposits of the Des Moines lobe. The loamy till deposits are loam in texture with a few beds and lenses of stratified sediment. The loamy till deposits are underlain by Superior lobe stratified sediment or till and are generally at a depth of more than 50 feet. This deposit includes small areas of thick, fine, loamy colluvium sediment (Meyer and Hobbs, 1989).

According to Olsen and Bloomgren (1989), the uppermost bedrock units for the majority of the Site are the St. Lawrence and Franconia Formations, which consist of dolomitic siltstone and shale and fine-grained, glauconitic sandstone and shale. Additionally, the uppermost bedrock unit for the northeastern portion of the Site is the Jordan Sandstone, which consists of quartzose sandstone that is carbonate cemented in the upper 10 to 15 feet.

4.1.3 Hydrogeology

The depth to groundwater in the vicinity of the Site ranges from approximately 20 to 30 feet below land surface (Kanivetsky, 1989).

According to published geologic information, the regional groundwater flow direction within the unconsolidated deposits in the Site vicinity is generally to the west (Kanivetsky, 1989). However, given the topography at the Site and the proximity to French Lake to the northeast, there may be localized flow to the east and northeast. The general groundwater flow direction within the uppermost bedrock aquifer in the Site vicinity, the Franconia-Ironton-Galesville Aquifer, is likely to the northeast (Kanivetsky, 1989).

The Site-specific groundwater flow direction was not determined through direct measurement during this Phase I ESA. Additional field investigation, beyond the Scope of Services of this Phase I ESA, would be required to determine this information.

4.2 Regulatory Database Review

We obtained regulatory database information pertaining to the Site and surrounding area from Environmental Risk Information Services, Ltd. (ERIS). The ERIS report is a compilation of records of facilities that are included on current federal and state environmental regulatory databases. The databases were searched based on the specified minimum search distances from the Site as established by ASTM E1527-21.

The ERIS report also includes a description, source reference, date of acquisition, and the specified approximate minimum search distance criteria for each database and list. A copy of the ERIS report is attached in Appendix E.

We reviewed the ERIS report to identify records that indicate known or potential RECs on the Site and/or surrounding area and to evaluate the likelihood for those RECs to impact the Site based upon their distance, topographic position relative to the Site, and the documented presence of contaminant releases that have not been remediated to the satisfaction of regulatory authorities. In addition to the ASTM standard environmental records reviewed, ERIS provides listings based upon review of supplemental federal, state and local records (where available), and on exclusive or proprietary databases. Where those databases yielded relevant information regarding environmental conditions at or proximate to the Site, they have been included in the discussion below.

4.2.1 Site

Based on a review of the ERIS report, the Site is not listed on any of the standard environmental record sources as specified in ASTM E1527-21.

Based on a review of the ERIS report, the Site is not listed on any of the standard environmental record sources as specified in ASTM E1527-21. However, the Site boundary incorporates the Witcher Construction Co/JE Dunn Construction Co facility (listed below) and is plotted on the southern portion of the Site. Given the listing's address and location, the facility should be plotted on the adjoining property to the south.

4.2.2 Adjoining Properties

Based on the ERIS report, the following facilities are identified on properties that adjoin the Site:

- ***Witcher Construction Co/JE Dunn Construction Co, 11771 Troy Lane North, Dayton, Minnesota (Map ID #1)***, is located on the south adjoining property. The ERIS report indicates that the Site is listed on the Resource Conservation and Recovery Act Very Small Quantity Generator (VSQG)/Hazardous Waste Generator (RCRA-GEN), Facility Registry Service/Facility Index (FINDS/FRS), Aboveground Storage Tank (AST), and Minnesota Pollution Control Agency Interests (MPCA AI) databases. According to the ERIS report, waste streams identified for the facility included ignitable waste and nonhalogenated solvents. As of January 2023, there have been no Compliance Monitoring and Enforcement (violation) records associated with the facility. The FINDS/FRS is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. According to the ERIS report, one 300-gallon used oil AST was registered at the facility on October 2, 2001 and is made out of carbon steel. No leaks have been reported with the AST at the facility. Lastly, the MPCA AI represents locations and facilities associated with wastewater, storm water, hazardous waste, feedlots, solid waste, tanks, and other agency programs.
- ***Codema LLC/Elevation Coating Warehouse, 11790 Troy Lane North, Dayton, Minnesota (Map ID #2)***, is located on the south adjoining property. The ERIS report indicates that the facility is listed on the FINDS/FRS, MPCA AI, and RCRA VSQG databases. According to the ERIS report, FINDS/FRS is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. According to the ERIS report, the MPCA AI represents locations and facilities associated with wastewater, storm water, hazardous waste, feedlots, solid waste, tanks, and other agency programs. According to the ERIS report, waste streams identified for the facility included unknown and ignitable waste. As of January 2023, there have been no Compliance Monitoring and Enforcement (violation) records associated with the facility.

- ***Jim and Kris Steller (property), 11870 West French Lake Road, Dayton, Minnesota (Map ID #3)***, is located on the east adjoining property. The ERIS report indicates that the facility is listed on the FEEDLOTS and MPCA AI databases. According to the ERIS report, animal feedlots provide information and context to support decisions on animal health, land use, and maintain environmental quality. At this property, Sovereign Stables (French Lake Equestrian), no violations have been reported. According to the ERIS report, the MPCA AI represents locations and facilities associated with wastewater, storm water, hazardous waste, feedlots, solid waste, tanks, and other agency programs.
- ***Gerald A Knutson (property), 11771 West French Lake Road, Dayton, Minnesota (Map ID #4)***, is located on the south adjoining property. The facility is listed on RCRA VSQG and MPCA AI databases. According to the ERIS report, waste streams identified for the facility included ignitable waste. As of January 2023, there have been no Compliance Monitoring and Enforcement (violation) records associated with the facility. According to the ERIS report, the MPCA AI represents locations and facilities associated with wastewater, storm water, hazardous waste, feedlots, solid waste, tanks, and other agency programs.

4.2.3 Surrounding Area

We reviewed the ERIS report for facilities located beyond adjoining properties that may indicate a release or likely release of hazardous substances and/or petroleum products that may impact the Site. Based on factors that include the nature of the database listing, regulatory status, distance from the Site, and/or location relative to the regional groundwater flow direction, as referenced in Section 4.1, no facilities were identified report that appear to warrant further consideration as potential RECs.

The Site is located in an area of current and historical industrial and commercial use. Numerous properties are listed in the regulatory report in the vicinity of the Site with reported releases of hazardous substances and/or petroleum products. Refer to Section 8.0 for our opinion regarding the facilities with reported releases of hazardous substances and/or petroleum products in the surrounding area and their potential to impact the Site.

4.2.4 Unmapped Facilities

The ERIS report identified unmappable or orphan facilities, which, because of poor or inadequate address information, could not be located. Using online mapping resources, all unmappable facilities were identified outside the appropriate minimum search distances for the Site or could not be located based on the information provided. It is our opinion the unmappable facilities do not warrant further consideration as potential RECs.

4.2.5 Additional Environmental Record Sources

To enhance and supplement the regulatory database report, we requested reasonably ascertainable local city, county, or state records to identify information relevant to the identification of potential RECs at the Site.

State Regulatory Websites

The Minnesota Department of Agriculture (MDA) "What's In My Neighborhood" Agricultural Interactive Mapping and the MPCA "What's In My Neighborhood" websites were accessed to evaluate for regulatory listings at the Site, adjoining properties, or surrounding properties that would be of environmental concern but were not identified in the regulatory database report.

We did not identify facilities on the state regulatory websites we accessed that were not already listed in the ERIS report discussed in Section 4.2.

City Information

Braun Intertec requested Site-specific information of environmental relevance from the City of Dayton, Minnesota on May 11, 2023. At the time of this assessment, Braun Intertec has not received a response to date, but will notify the User upon receiving information that would change the conclusions of this report.

Well Databases

The Minnesota Geological Survey (MGS) maintains the Minnesota Well Index (MWI), which is a limited database of water well records. The MWI was accessed through the Minnesota Department of Health (MDH) website. Not all private water wells are listed in that database. In addition, the MDH maintains a database of water well records disclosed and registered during real estate property transactions, the Well Disclosure Certificate database, within their Well Management Section that may contain well records not listed in the MWI. Our review of these sources identified no well records.

4.2.6 Regulatory Agency File and Records Review

The purpose of the regulatory file review is to obtain sufficient information to assist in determining if a REC, CREC, HREC, or a *de minimis* condition exists at the Site in connection with a regulatory report listing.

Although the Site and/or an adjoining property were identified in the regulatory report, based on our review of the database listing(s), it is our opinion that a regulatory agency file and records review is not warranted due to factors that include the nature and regulatory status of the listing, the facility's distance from the Site, and/or its location relative to the estimated regional groundwater flow direction.

4.3 Historical Use Information Review

The objective of compiling and analyzing historical property information is to develop a history of the previous uses of the Site, adjoining properties, and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the Site.

The following table summarizes the historical information reviewed. Details regarding the information reviewed are provided in the sections below.

Historical Source	Provided By	Years Available
Fire Insurance Maps	Historical Information Gatherers, Inc. (HIG)	No coverage
Topographic Maps	HIG	1909, 1958, 1981, 1993, 2013, 2016, and 2019
Aerial Photographs	HIG	1937, 1940, 1947, 1956, 1960, 1966, 1971, 1974, 1978, 1984, 1987, 1994, 2000, 2009, 2012, 2016, and 2021
City Directories	HIG	Approximate 5-year intervals for W. French Lake Road/N. 117th Avenue (1982-2018) and N. Troy Lane (1987-2018)

If relevant and useful, other on-line historical sources were reviewed and are cited in the subsections below.

4.3.1 Fire Insurance Maps

Historical maps sometimes produced by private fire insurance map companies may be useful to indicate uses of the Site and nearby properties at specified dates. The information noted on the maps commonly includes uses of individual structures, locations of fuel and/or chemical storage tanks, and storage of other potentially toxic substances. According to HIG, no historical map coverage is available for the Site. A copy of the no coverage document is provided in Appendix G.

4.3.2 Topographic Maps

Topographic maps provide a detailed record of a land area, giving geographic positions and elevations for both natural and man-made features such as pipelines, power lines, and many types of buildings. Maps published after 2009 typically do not include detail related to man-made features. Copies of the historical topographic maps are attached in Appendix H. The following is a summary of the information reviewed.

Site

No structures are depicted at the Site on any of the topographic maps that were reviewed. The Site consists of cultivated agricultural land based on aerial photographs of the corresponding time period. The 1909 topographic map incorrectly depicts West French Lake Road bisecting the Site in the northeast corner. West French Lake Road should border the Site in the northeast corner.

The 2013 to 2019 topographic maps only show topography, roads, waterways, and other similar features; therefore, buildings or areas of development are not depicted on these maps. The Site is used for cultivated agricultural land based on aerial photographs of the corresponding time period.

Adjoining Properties

1909

Surficial water and low-lying areas, along with French Lake can be seen to the northeast of the Site. Railroad tracks are depicted to the southwest of the Site.

1958

The current alignment of West French Lake Road borders the Site to the northeast. A small black polygon associated with a structure can also be seen to the northeast of the Site.

1981

An area labeled as “trailer park” can be seen to the west of the Site associated with the current location of Dayton Park (manufactured home community). Four black squares likely associated with residential structures are depicted to the east and southeast of the Site. Green space is also depicted to the north and northeast of the Site.

1993

Two industrial or commercial-sized structures are depicted on the adjoining property to the south of the Site, along with two more industrial or commercial-sized structures depicted south of the adjoining properties to the south. Two additional squares are also depicted to the southeast of the Site associated with previously mentioned square structures.

2013 - 2019

French Lake Open Golf Course can be seen to the southeast of the Site. No other changes are noted at the Site, adjoining, or surrounding areas.

4.3.3 Aerial Photographs

Aerial photographs provide a visual record of land use and landcover conditions frequently dating back to the 1930s or 1940s. Copies of the aerial photographs are attached in Appendix I. The following is a summary of the information reviewed.

Site

1937 - 1940

The northwestern area of the Site appears to be primarily grass-covered land and the eastern portion of the Site appears to be a low-lying area. The remainder of the Site appears cultivated. An apparent road or trail can be seen bisecting the northern portion of the Site that originates from the northeast adjoining property. The trail eventually travels off Site to the north, and moves down to the southwest to the southwest corner of the Site. The apparent road or trail ends in the southwest corner where soil disturbance can be seen in this area.

1947

Trails are apparent in a semi-circular area on the east portion of the Site. The trails may be associated with recreation or farming; the exact use is not clear. Additional trails in more circular patterns are evident on the north central portion of the Site.

1956 - 1960

The trails on the eastern portion of the Site appear to have changed into grassy, low-lying areas. Trees and grassy areas can be seen in the northwest corner of the Site.

1966 - 1987

The Site appears predominantly as cultivated agricultural land, with the exception of the eastern edge of the Site, which appears to consist of a wetland or low-lying area.

1994 - 2021

Some areas of crop damage are visible on the southwestern and central portions of the Site. These areas appear to contain vegetation consistent with wetlands or low-lying areas. The eastern portion of the Site continues to appear as a low-lying or wetland area.

Adjoining Properties

1937 - 1960

Buildings associated with the current location of the Sovereign Stables (French Lake Equestrian) property can be seen on the adjoining property to the east-northeast of the Site. The current alignment of French Lake Road can be seen bordering the Site to the northeast.

1966

Structures consistent in size and shape with manufactured homes associated with the current location of the Dayton Park manufactured home community are visible bordering the Site to the west. An oval-shaped animal pen is visible at the Sovereign Stables (French Lake Equestrian) property to the northeast of the Site.

1971

Small structures associated with a residential homestead can be seen adjacent to the east/southeast of the Site.

1974 - 1987

The animal pen is no longer depicted at the Sovereign Stables (French Lake Equestrian) property to the northeast of the Site. A pole-shed type building is apparent in the area of the former animal pen on the 1984 aerial photograph. A rectangular-shaped fenced/pen area is visible adjacent to the south of the new pole building.

1994 - 2009

Three industrial or commercial-sized structures are now depicted on the adjoining property to the south of the Site associated with the current location of JE Dunn Construction and Codema (engineering firm properties). Paved parking areas and outdoor storage for these structures can also be seen to the south of the Site.

2012 - 2021

A cul-de-sac associated with the current alignment of Troy Lane North can be seen to the south of the Site, bisecting the JE Dunn Construction and Codema (engineering firm) properties. More outdoor storage can be seen to the south of the Site, west of the JE Dunn Construction main building. No other changes are shown or depicted at the adjoining properties or surrounding areas on the aerial photographs.

4.3.4 City Directories

City directories provide a listing, by street address, of residents, businesses, organizations, or institutions for the date of directory publication. The available city directory listings were reviewed to identify past occupants at the Site and surrounding area. City directories for W. French Lake Road/N. 117th Avenue for the years 1982-2018 and N. Troy Lane for the years 1987-2018 were reviewed. Copies of the city directories reviewed are provided in Appendix J. A summary of the relevant information is provided below.

Site

The Site address is not listed on any of the directories reviewed.

Adjoining Properties

The surrounding properties were listed primarily as residential or commercial from 1987/88 to 2018. Notable listings included Codema (engineering firm) from 1992/93 to 2018, JE Dunn Construction in 2013, and French Lake Stables in 2007.

4.3.5 Previous Environmental Documents

No previous environmental reports or documents containing relevant historical information were provided for our review.

4.3.6 Other Historical Resources

No other historical sources were reviewed as part of this assessment.

4.3.7 Summary of Site History

Based upon the above information sources, the Site has been predominately used as agricultural land since at least 1937 and has been used as such up to the present. The eastern edge of the Site has been a low lying/wetland area since at least 1937 and additional low-lying/wetland areas become evident at the Site starting in 1994.

4.3.8 Summary of Historical Information for Adjoining and Area Properties

The surrounding area was largely undeveloped at the time of the earliest historical sources (1937 through 1960), with the exception of the current location of Sovereign Stables (French Lake Equestrian) property that can be seen on the adjoining property to the northeast of the Site. The current alignment of French Lake Road borders the Site to the northeast. Small structures associated with the current location of the Dayton Park (trailer park) can be seen bordering the Site to the west in 1966. In 1994, industrial or commercial-sized structures can be seen on the adjoining properties to the south of the Site associated with the current location of JE Dunn Construction and Codema (engineering firm). Paved parking areas and outdoor storage for these structures can also be seen to the south of the Site. A cul-de-sac associated with the current alignment of Troy Lane North can be seen to the south of the Site, splitting, or bisecting both JE Dunn Construction and Codema (engineering firm) properties beginning in 2012.

5.0 Site Reconnaissance

The objective of the site reconnaissance is to obtain information and make observations to help indicate the likelihood of identifying RECs in connection with the Site. The Site Layout is presented on Figure 2, and photographs of the Site are presented in Appendix K.

5.1 Observations, Methodology and Limiting Conditions

Braun Intertec Environmental Scientist Michael Carter visited the Site on May 10, 2023. Our staff were unaccompanied during the Site reconnaissance. At the time, the weather was sunny and breezy with a temperature of about 65 degrees Fahrenheit.

Observations made at the time of the Site reconnaissance were conducted by physically traversing and visually observing the exterior aspects of the Site. Adjoining properties were visually observed from the Site boundaries or nearby public rights-of-way.

5.2 Site Observations

5.2.1 Site Description

At the time of this assessment, the Site consisted of one parcel (PID: 3012022340001) totaling 44.62 acres. The majority of the Site was developed as cultivated agricultural land. Wooded, low-lying areas were present on the northern and southwestern portions of the Site. Standing/surficial water was also observed from snowmelt and wet conditions at the time of the Site reconnaissance on the southern portion of the Site.

There were no other apparent past uses evident from observations during the Site reconnaissance.

5.2.2 Pits, Ponds, Pools of Liquid, or Lagoons

No indications of pits, ponds, pools of liquid, or lagoons having the potential to contain hazardous substances or petroleum products were observed at the Site or on adjoining properties at the time of our reconnaissance.

5.2.3 Stained or Corroded Surfaces

No stained or discolored soil was observed at the time of the Site reconnaissance.

5.2.4 Solid Waste Disposal

At the time of the reconnaissance, no indications of waste disposal areas, fill, mounds, depressions, burn pits or disturbed areas were observed that were suggestive of the presence of buried debris or other solid waste disposal.

5.2.5 Stressed Vegetation

No areas of stressed, discolored, stained or dead vegetation beyond what would be expected due to seasonal conditions were observed at the time of the Site reconnaissance.

5.2.6 Hazardous Substances and Petroleum Products

No indications of current and/or historical use, storage, staining, or spills of hazardous substances or petroleum products were observed at the Site at the time of the reconnaissance.

5.2.7 Storage Tanks

No indications of aboveground or underground storage tanks (AST/UST) were noted at the Site at the time of the reconnaissance.

5.2.8 Drums and Unidentified Substance Containers

No labeled drums or drums containing unidentified substances suspected of being a hazardous substance or petroleum product were observed at the Site at the time of our reconnaissance.

5.2.9 Odors

No strong, pungent, or noxious odors were noted at the time of the Site reconnaissance.

5.2.10 Potential PCB-Containing Electrical and Hydraulic Equipment

No indications of potential PCB-containing electrical or hydraulic equipment were noted at the Site at the time of the reconnaissance.

5.2.11 Wastewater Discharges

No process wastewater was observed during the Site reconnaissance.

5.2.12 Sewage Disposal System

According to Mr. Master, the Site is not currently connected to municipal sewer services.

5.2.13 Wells

No indications of wells such as monitoring wells, dry wells, irrigation wells, injection wells, abandoned wells, or other non-potable wells were observed at the Site at the time of the reconnaissance.

5.2.14 Potable Water Supply

According to Mr. Master, the Site is not connected to municipal water services.

5.3 Current and Past Use of Adjoining Properties and Surrounding Area

The area reconnaissance was performed to assist in determining whether land use on the adjacent or nearby properties may have features, activities, uses, or conditions that indicate the presence of RECs. The area was toured by foot and automobile from public rights-of-way. The properties surrounding the Site are as follows:

Direction	Property Use
North	Wooded and grassy areas with West French Lake Road and French Lake located beyond
South	JE Dunn Construction and Codema (engineering firm) with commercial properties located beyond
East	West French Lake Road with Sovereign Stables and Boarding (French Lake Equestrian) and residential/homesteads with residential/homesteads and grassy areas located beyond
West	Dayton Park (trailer park homes) with commercial properties located beyond

No obvious indications of environmental concern were noted on adjoining properties at the time of the reconnaissance.

6.0 Interviews

The objective of interviews is to obtain information indicating RECs in connection with the Site. Interviews with past and present owners, operators, and occupants of the property, consisted of questions asked in an attempt to obtain information about current and past uses and conditions of the Site.

6.1 Site Representatives

Mr. Mark Master (owner) acted as the Site representative on behalf of the Site. Mr. Master stated the Site and adjoining properties have primarily been used for farming and agricultural purposes. Mr. Master was not aware of the presence or past uses of hazardous substances or petroleum products, storage tanks, wells, pits or lagoons, or the unauthorized discharge of solid wastes or wastewaters.

Additionally, Mr. Master was not aware of the existence of environmental documents such as reports, permits, or plans, nor of any pending, threatened, or past litigation, proceedings, or notices from governmental agencies relevant to the assessment. Mr. Master was unaware of environmental concerns in connection with the Site.

6.2 Site Occupants

The Site is 44.62 acres in size and the majority of the Site is used for cultivated agricultural purposes. Therefore, no Site occupants were available to interview.

6.3 Local Government Officials

Braun Intertec contacted representatives of local government agencies to obtain information relevant to the identification of RECs on the Site. We did not interview local government officials in person; however, we submitted written requests for information via letter or electronic media; information obtained from the inquiry is provided in Section 4.2.5 of this report.

6.4 Others

No additional persons were interviewed as part of the assessment.

7.0 Data Gaps

Data gaps, which result from a lack of or inability to obtain information required by this practice despite good faith efforts, may include limiting conditions such as client imposed constraints; physical obstructions that may have limited observations of the Site or surrounding area; physical constraints such as snow, rain or other weather conditions; and data failures which result from a failure to achieve the historical research objectives of developing a history of the previous uses of the Site, adjoining properties, and surrounding area.

No data gaps were identified as part of this Phase I ESA with the exception of the following:

- Observation of the northeast corner of the Site was limited due to dense vegetation.

- Responses to our inquiries to local government offices and/or officials were not received prior to issuance of the assessment.
- Historical resources were not readily available for 5-year-or-less intervals from the time of the first developed use.

The identified data gaps did not affect the environmental professional's ability to render opinions regarding conditions indicative of a release or threatened release and are unlikely to alter the report findings.

8.0 Findings and Opinions

According to the User, the Phase I ESA was conducted in association with the redevelopment of the Site. Opinions expressed herein are influenced by the stated reason for conducting the Phase I ESA. Furthermore, the expressed opinions might not be applicable to alternate reasons for reliance on the content of the Phase I ESA. The findings include identified features, activities, uses, and conditions that may indicate the presence or likely presence of hazardous substances or petroleum products at the Site; and include a discussion of significant data gaps, if any. The following findings are based on the results of our assessment:

- The Site consisted of one parcel (PID: 3012022340001) totaling 44.62 acres. The majority of the Site was developed as cultivated agricultural land. Wooded, low-lying areas were present on the northern and southwestern portions of the Site. Standing/surficial water was also observed from snowmelt and wet conditions at the time of the Site reconnaissance on the southern portion of the Site. It is our opinion the historical and current use of the Site as cultivated agricultural land does not represent a REC.

9.0 Conclusions

Braun Intertec has performed a Phase I ESA of the Site in general conformance with the scope and limitations of ASTM E1527-21, of the MTL Addition Development property located northeast of 11771 Troy Lane North, PID: 3012022340001 in Dayton, MN. Any exceptions to, or deletions from, this practice are described in Section 1.4.

This assessment has revealed no RECs, CRECs, or significant data gaps in connection with the Site.

10.0 Environmental Professional Statement

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Qualifications of the environmental professional and personnel who completed the ESA are presented in Appendix L.

Sincerely,

BRAUN INTERTEC CORPORATION

A handwritten signature in black ink, appearing to read "J. Michael Carter".

J. Michael Carter
Environmental Scientist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

A handwritten signature in blue ink, appearing to read "Mark A. Ciampone".

Mark A. Ciampone, PG
Business Unit Leader, Senior Scientist

Appendix A

Definitions

Definitions

Activity and Use Limitations (AUL) – Legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property.

Adjoining Properties – Any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

Bona Fide Prospective Purchaser Liability Protection – A person may qualify as a bona fide prospective purchaser if, among other requirements, such person made “all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices.” Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after January 11, 2002.

Business Environmental Risk – A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

Contiguous Property Owner Liability Protection – A person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the subject property and did not know or have reason to know that the subject property was or could be contaminated by a release or threatened release from the contiguous property. The all appropriate inquiries must not result in knowledge of contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the contiguous property owner liability protection. See Appendix X1 (of ASTM E1527-21) for the other necessary requirements that are beyond the scope of this practice.

Controlled Recognized Environmental Condition—A recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

Data Failure – A failure to achieve the historical research objectives in 8.3.1 (of ASTM E1527-21) even after reviewing the standard historical sources in 8.3.4.1 through 8.3.4.8 (of ASTM E1527-21) that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

Data Gap – A lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.).

De Minimis Condition – A condition related to a *release* that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis* condition is not a recognized environmental condition nor a controlled recognized environmental condition.

Hazardous Substance – A substance defined as a hazardous substance pursuant to CERCLA 42 U.S.C. §9601(14), as interpreted by EPA regulations and the courts:“(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §6901 et seq.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 U.S.C. §7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).”

Hazardous Waste – Any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of RCRA, as amended, (42 U.S.C. §6921) (but not including any waste the regulation of which under RCRA (42 U.S.C. §§6901-6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 U.S.C. §6903, as: “a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may– (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”

Historical Recognized Environmental Condition – A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by a regulatory authority or authorities, without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

Innocent Landowner – A person may qualify as one of three types of innocent landowners: (1) a person who “did not know and had no reason to know” that contamination existed on the subject property at the time the purchaser acquired the subject property; (2) a government entity which acquired the subject property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (3) a person who “acquired the facility by inheritance or bequest.” To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the innocent landowner defense. See Appendix X1 (of ASTM E 1527-21) for the other necessary requirements that are beyond the scope of this practice.

Key Site Manager – The person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property.

Landowner Liability Protections (LLPs) – A defense to CERCLA available to bona fide prospective purchasers, contiguous property owners, and innocent landowners See 42 U.S.C. §§9601(35)(A), 9601(40), 9607(b), 9607(q), 9607®.

Material Threat – Obvious threat which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in the impact to public health or the environment.

Petroleum Products – Those substances included within the meaning of the petroleum exclusion to CERCLA, 42 U.S.C. §9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics.)

Property Use Limitation – Limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

Recognized Environmental Condition (REC) – (1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. For the purposes of this definition, “likely” is that which is neither certain nor proved but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given herein.

Significant Data Gap – A data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

**User Questionnaire and
User-Provided Documents**

ASTM Practice E 1527-13 User Questionnaire

Site:

Name: Mark Mask Date: 5/11/23
Company: Masker Family Foresters II

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (the "Brownfields Amendment"), the User must conduct the following inquiries. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

- (1) Environmental cleanup liens that are filed or recorded against the property.**
The types of title reports that may disclose environmental liens include Preliminary Title Reports, Title Commitments, Condition of Title, and Title Abstracts. Chain-of-title reports will not normally disclose environmental liens. Did a search of *recorded land title records* (or judicial records where appropriate) identify any environmental cleanup liens filed or recorded against the *property* under federal, tribal, state or local law?
- (2) Activity and use limitations (AULs) that are in place on the property or that have been filed or recorded against the property.**
The types of title reports that may disclose AULs include Preliminary Title Reports, Title Commitments, Condition of Title, and Title Abstracts. Chain-of-title reports will not normally disclose AULs. Did a search of *recorded land title records* (or judicial records where appropriate) identify any AULs, such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?
- (3) Specialized knowledge or experience of the person seeking to qualify for the LLP.**
Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?
- (4) Relationship of the purchase price to the fair market value of the property if it were not contaminated.**
Does the purchase price being paid for this *property* reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

(5) Commonly known or reasonably ascertainable information about the property.

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,

(a) Do you know the past uses of the *property*? If so, please explain.

farm

(b) Do you know of specific chemicals that are present or once were present at the *property*? If so, please explain.

no

(c) Do you know of spills or other chemical releases that have taken place at the *property*? If so, please explain.

NO

(d) Do you know of any environmental cleanups that have taken place at the *property*? If so, please explain.

NO

(6) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation.

Based on your knowledge and experience related to the *property*, are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*? If so, please explain.

no

Client Information Request Form for Phase I Environmental Site Assessments

Project/Site Name: _____

So that we may serve you better, please answer the following questions concerning the project Site. If a question does not apply to the Site, write "NA." If you do not know the answer, write "Unknown."
Please return the completed form along with one copy of the signed authorization letter.

Client Objectives

A. What is your interest in the Site? Check all that apply.

- ☐ Buying property
- ☐ Refinancing
- ☐ Selling property
- ☒ Development
- ☐ Redevelopment
- ☐ Other: _____

B. In addition to the User, are there any additional entities you would like included on the report for reliance purposes?

NO

C. A final PDF of the report will be provided. If hard copies are needed, how many? 0

D. What is the desired completion date for this project?

Date: 6/24

E. Do you wish to receive a verbal report before the written report is received?

☐ Yes ☒ No

F. Is confidentiality requested?

☒ Yes ☐ No

If so, to whom is it limited?

Area Manager/master

Site-Specific Information

A. Where is the Site located?

Address: Dayton Trolley

Legal Description: Master Addition

B. Who is the current property owner?

Name: Masker Family INV II

Phone: 763 464 2605

C. Who will provide access to the property and/or who is the Site contact?

Name: Mark Masker

Phone: 763 464 2605

D. Has any previous environmental work been performed on the Site? Check all that apply.

☐ No previous environmental work has been performed

☒ Unknown

☒ Geotechnical/Soil borings

☐ Phase I Environmental Site Assessment

☐ Phase II Environmental Site Assessment

☐ Soil Vapor/Sub-slab Soil Vapor Investigation

☐ Radon Investigation

☐ Asbestos/Lead-based Paint Inspections

☐ Hazardous Materials Testing

☐ Other: _____

If previous environmental work has been performed...

When was it performed? _____

By whom?

Name: _____

Phone: _____

What were the results?

Are copies of the report(s) available?

☐ Yes ☐ No ☐ Unknown

E. Is a current Site plan available? If yes, please provide.

☐ Yes ☐ No ☐ Unknown

F. How large is the property (total acreage)?

_____ acres

G. How is the property currently used? Check all that apply.

☐ Undeveloped

☐ Light industrial

☐ Agricultural

☐ Retail

☐ Residential

☐ Office Building

☐ Parking Lot

☐ Warehouse

☐ Commercial

☐ Other: _____

H. What is the proposed use of the property?

Delu

I. Are there existing buildings on the property?

☐ Yes ☒ No ☐ Unknown

If yes:

How many buildings? _____

What year was each building originally built? _____

What year(s) was/were any subsequent addition(s) completed for each building? _____

What is the total square footage of each building and/or additions? _____

Are you aware of any asbestos-containing building materials in any building? _____

Give a brief description and use of each building. _____

J. What was the property used for in the past?

Farmer

K. Are there currently or previously any aboveground or underground storage tanks located on the property?

Aboveground storage tanks: ☐ Yes ☒ No ☐ Unknown

Underground storage tanks: ☐ Yes ☒ No ☐ Unknown

If yes:

Where are they located? _____

What are the sizes and contents of the tanks (e.g., 500-gallon diesel)? _____

When were the tanks installed? _____

Are there any maintenance records available for the tanks? _____

Are the tanks currently being used?

☐ Yes ☐ No ☐ Unknown

If no:

When were the tank(s) closed? _____

Was the MPCA notified? _____

L. Have hazardous chemicals or petroleum products ever been stored at the Site?

Hazardous chemicals: ☐ Yes ☐ No ☒ Unknown

Petroleum products: ☐ Yes ☐ No ☒ Unknown

If yes, which ones? _____

M. Has the property ever been used or is the property currently used for dumping or landfilling?

unk

Client Information Request Form
for Phase I Environmental Site Assessments

N. Utilities

Are there any wells or septic systems formerly or currently located at the Site?

Wells: ☐ Yes ☒ No ☐ Unknown

Septic systems: ☐ Yes ☐ No ☒ Unknown

Is the Site connected to city sewer and water?

Sewer: ☐ Yes ☒ No ☐ Unknown

Water: ☐ Yes ☒ No ☐ Unknown

What types of utilities service the Site? Check all that apply.

☒ Unknown

☐ Gas

☐ Electric

☐ Propane

☐ Other: _____

O. Are there any environmental concerns regarding the property or adjoining properties?

None

P. How are the adjacent properties used?

same / similar

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Unplottable Summary

Total: 0 Unplottable sites

DB	Company Name/Site Name	Address	City	Zip	ERIS ID
----	---------------------------	---------	------	-----	---------

No unplottable records were found that may be relevant for the search criteria.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

National Priority List - Proposed:

PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jan 25, 2023

SEMS List 8R Active Site Inventory:

SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985:

[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Comprehensive Environmental Response, Compensation and Liability Information System -

[CERCLIS](#)

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 23, 2023

RCRA non-CORRACTS TSD Facilities:

[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jan 23, 2023

RCRA Generator List:[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Small Quantity Generators List:[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 23, 2023

RCRA Very Small Quantity Generators List:[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 23, 2023

RCRA Non-Generators:[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Sites with Controls:[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 23, 2023

Federal Engineering Controls-ECs:[FED ENG](#)

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Federal Institutional Controls- ICs:[FED INST](#)

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Jan 25, 2023

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Historical Gas Stations:**HIST GAS STATIONS**

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:**REFN**

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals:**BULK TERMINAL**

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property:**SEMS LIEN**

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents:**SUPERFUND ROD**

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Dec 22, 2022

Formerly Utilized Sites Remedial Action Program:**DOE FUSRAP**

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State**Minnesota Permanent List of Priorities:****PLP**

The state Superfund sites in Minnesota are listed on the Minnesota Permanent List of Priorities (PLP). The hazardous waste sites on the PLP are in various stages of remediation. At these sites investigation and cleanup are needed, cleanup is underway, or cleanup has been completed and long-term monitoring or maintenance continues. This data is made available by the Minnesota Pollution Control Agency (MPCA). This database is state equivalent NPL.

Government Publication Date: Mar 8, 2023

Delisted Permanent List of Priorities (PLP):**DEL PLP**

This list contains sites that were previously included in Permanent List of Priorities (PLP) maintained by Minnesota's Pollution Control Agency (MPCA) but have now been delisted. This database is state equivalent NPL.

Government Publication Date: Mar 8, 2023

Minnesota Site Remediation Section Database:**SHWS**

The Site Remediation Section identifies, investigates, and determines appropriate cleanup plans for abandoned or uncontrolled hazardous waste sites where a release or potential release of a hazardous substance poses a risk to human health or the environment. This data is made available by the Minnesota Pollution Control Agency (MPCA)'s Site Remediation Section. This database is state equivalent CERCLIS.

MPCA Site Assessment Sites:

[SITE ASSESSMENT](#)

A list of active and closed sites that are currently under site assessment by Minnesota Pollution Control Agency (MPCA) and are a part of MPCA Remediation Sites list.

Government Publication Date: Mar 8, 2023

Permitted Solid Waste Facilities:

[SWF/LF](#)

A list of permitted solid waste and landfill facilities made available by the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 27, 2023

Closed Landfills Priority List:

[LCP](#)

The Minnesota Legislature enacted the Landfill Cleanup Act (LCA) in 1994 to ensure the proper closure and post-closure care at up to 112 closed, permitted municipal sanitary landfills located throughout the state. Based on this legislation, the Minnesota Pollution Control Agency (MPCA) created the Closed Landfill Program (CLP) to administer the LCA mandates. This data made available by The Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Apr 14, 2022

Unpermitted Dump Sites:

[UNPERMITTED LF](#)

The Minnesota Pollution Control Agency (MPCA) defines "dumps" as those landfills that never held a valid permit from the MPCA. Generally, dumps existed prior to the permitting program established with the creation of the MPCA in 1967. This database made available by Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Recycling Markets Directory:

[RECYCLING](#)

The Recycling Markets Directory is provided by the Minnesota Pollution Control Agency (MPCA). The markets in this database accept large (commercial) quantities of materials.

Government Publication Date: Nov 10, 2022

Historical Leaking Underground Storage Tanks:

[HIST LUST](#)

A list of leaking underground storage tanks (LUSTs) in the tanks database maintained by the Minnesota Pollution Control Agency (MPCA) up until Nov 01, 2016.

Government Publication Date: Nov 1, 2016

Deleted Leaking Underground Storage Tanks:

[DEL LUST](#)

A list of leaking underground storage tanks that are often deleted for various reasons. Deletion occurs primarily due to a duplication, or that the source was determined to not be from a tank. This list was provided by Minnesota Pollution Control Agency.

Government Publication Date: Jan 5, 2016

Historical Leaking Aboveground Storage Tanks:

[HIST LAST](#)

A list of leaking aboveground storage tanks (LASTs) in the tanks database maintained by the Minnesota Pollution Control Agency (MPCA) up until Nov 01, 2016.

Government Publication Date: Nov 1, 2016

Historical Leak Sites:

[HIST LEAKSITES](#)

A list of leak sites that were neither determined as aboveground nor underground in the tanks database maintained by the Minnesota Pollution Control Agency (MPCA) up until Nov 01, 2016.

Government Publication Date: Nov 1, 2016

MPCA Remediation Leak Sites:

[LST REM SITE](#)

A list of leak sites in which Minnesota Pollution Control Agency (MPCA) is involved in remediation activities, this list is published by MPCA.

Government Publication Date: Mar 8, 2023

MPCA Tank Incidents:

[LST INCIDENT](#)

A list of leaking and registered tank sites in Minnesota that includes locations, details of tank installation and construction, and installed safety measures. This list is provided by Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Delisted Leaking Storage Tanks:

DELISTED LST

This database contains a list of closed leaking storage tank sites that were removed from the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Underground Storage Tanks:

UST

In Minnesota, there are about 18,000 regulated underground storage tanks (USTs) currently in use. The Underground Storage Tank Program in the Minnesota Pollution Control Agency (MPCA) was created to help prevent contamination caused by leaking tanks. This is a list that contains all regulated USTs. This data made available by The Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Minnesota Above Ground Storage Tanks:

AST

There are more than 20,000 regulated above-ground storage tanks (ASTs) currently in use across Minnesota. Most tanks located above ground containing liquid substances (i.e., not gaseous or solid at ambient temperature and pressure) are subject to the Minnesota Pollution Control Agency's (MPCA) rules for design and operation of ASTs. This list contains ASTs regulated by MPCA. This data made available by Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Tank Sites:

HIST TANK

A list of tank sites not included in AST or UST, this list maintained by the Minnesota Pollution Control Agency (MPCA) up until Dec 30, 2016.

Government Publication Date: Dec 30, 2016

Delisted Storage Tanks:

DELISTED TANK

This database contains a list of storage tank sites that were removed from the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Sites with Institutional Control Events:

INST

A list made available by the Minnesota Pollution Control Agency (MPCA) consisting of remediation sites that have various institutional controls in place.

Government Publication Date: Mar 31, 2023

Agricultural Contingency Sites Boundaries:

AG CONTINGENCY

The Minnesota Department of Agriculture (MDA) Incident Response Unit (IRU) is the state lead agency for the investigation and remediation of incidents involving agricultural chemicals (pesticides and fertilizer). This MDA IRU database includes sites with a soil or ground water contingency, deed restriction, local ordinance, restrictive covenant or deed affidavit in place. The accuracy of the boundaries of these sites can be variable - in most cases, the site boundaries should be considered as only representing the vicinity of the soil or ground water contingency area or plume.

Government Publication Date: Mar 19, 2023

Petroleum Brownfields Program Sites:

BROWNFIELDS

The Minnesota Pollution Control Agency (MPCA)'s Petroleum Brownfields Program handles petroleum contamination under the Petroleum Tank Release Cleanup Act (Minnesota Statutes § 115C). This data made available by The Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Voluntary Investigation and Cleanup Program List:

VIC

The Minnesota Pollution Control Agency's (MPCA) Brownfield Program consists of an integrated program called the Voluntary Investigation and Cleanup (VIC) Program. This program handles hazardous substance contamination under Minnesota's Environmental Response and Liability Act (Minnesota Statutes § 115B). This database made available by Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Potential Voluntary Investigation and Cleanup Program Sites:

POTENTIAL VIC

This listing of Potential Voluntary Investigation and Cleanup Program sites is provided by the Minnesota Pollution Control Agency (MPCA). These potential sites have not yet entered into the VIC Program until an application has been received at the MPCA.

Government Publication Date: Apr 22, 2016

MPCA Agency Interests:

MPCA AI

Facility, site and project locations from the Minnesota Pollution Control Agency's enterprise database, representing locations associated with waste water, storm water, hazardous waste, feedlot, solid waste, tanks, remediation, and other agency programs. Includes records from "What's In My Neighborhood Sites".

Government Publication Date: Dec 1, 2022

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands:

[INDIAN LUST](#)

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 5, which includes Minnesota, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 14, 2022

Underground Storage Tanks on Tribal/Indian Lands:

[INDIAN UST](#)

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 5, which includes Minnesota, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 14, 2022

Delisted Tribal Leaking Storage Tanks:

[DELISTED INDIAN LST](#)

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Underground Storage Tanks:

[DELISTED INDIAN UST](#)

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program:

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

PFOA/PFOS Contaminated Sites:

[PFAS NPL](#)

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Dec 28, 2022

Federal Agency Locations with Known or Suspected PFAS Detections:

[PFAS FED SITES](#)

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. Sites on this list do not necessarily reflect the source/s of contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

SSEHRI PFAS Contamination Sites:

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills:

[ERNS PFAS](#)

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

PFAS NPDES Discharge Monitoring:

[PFAS NPDES](#)

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Water Quality:

[PFAS WATER](#)

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities:

[PFAS TSCA](#)

The US Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) requiring facilities that manufacture or import chemical substances to report to EPA. This list is specific to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl substances (PFAS). Data file made available by the EPA and includes CDR/Inventory Update Reporting data from 1998 up to 2020. EPA makes notes the following about these data: this data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jun 20, 2022

PFAS Waste Transfers from RCRA e-Manifest :

[PFAS E-MANIFEST](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Aug 30, 2022

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Dec 11, 2022

Delisted Drycleaner Facilities:

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Dec 11, 2022

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites:

FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites:

[SMCRA](#)

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System:

[MRDS](#)

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites:

[LM SITES](#)

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations:

[ALT FUELS](#)

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG) fuel type locations.

Government Publication Date: Jan 3, 2023

Superfunds Consent Decrees:

[CONSENT DECREES](#)

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Air Facility System:

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers:

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

Spills reported to the Pollution Control Agency:

SPILLS

The Minn. Stat. §115.061, which has been in effect since 1969, describes the duty of people to notify the Minnesota Pollution Control Agency (MPCA) when spills occur. This is the list of spills reported to MPCA, and the list maintained by The Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 8, 2023

Department of Agriculture Spills:

AG SPILLS

The Minnesota Department of Agriculture Incident Response Unit is the regulatory authority of Agricultural Chemical (Ag-Chem) Incidents in Minnesota. This list contains pesticide and fertilizer incidents reported to the Response Unit. This data made available by The Minnesota Department of Agriculture, Incident Response Unit.

Government Publication Date: Mar 19, 2023

Historic spills reported to the Pollution Control Agency:

HIST SPL

The Minn. Stat. §115.061, which has been in effect since 1969, describes the duty of people to notify the Minnesota Pollution Control Agency (MPCA) when spills occur. This is the list of spills reported to MPCA, and maintained by The Minnesota Pollution Control Agency (MPCA). This list was maintained till 1 Nov 2016.

Government Publication Date: Nov 1, 2016

Registered Dry Cleaning Facilities:

DRYCLEANERS

The Minnesota Pollution Control Agency (MPCA) maintains this listing of registered dry cleaning facilities.

Government Publication Date: Sep 28, 2021

Delisted Drycleaners:

DELISTED DRYCLEANERS

List of sites that once appeared on - and have since been removed from - the list of registered dry cleaning facilities made available by the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Sep 28, 2021

PFAS in Groundwater Samples:

PFAS GW

A list of sites from the Minnesota Groundwater Contamination Atlas where Per- and Polyfluoroalkyl Substances (PFAS) were found in groundwater samples. This list is made available by the Minnesota Pollution Control Agency.

Government Publication Date: Nov 12, 2021

PFAS in Landfills:

[PFAS LANDFILL](#)

A list of sites in the Closed Landfill Program where Per- or polyfluorinated alkyl substances (PFAS) have been detected. This list is made available by the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Feb 28, 2023

Clandestine Drug Labs:

[CDL](#)

The Methamphetamine Laboratory Program at the Minnesota Department of Health (MDH) works to protect human health by providing technical advice on the remediation of clandestine methamphetamine production laboratories (meth labs) and decontamination of property exposed to meth lab activities.

Government Publication Date: Aug 23, 2021

Animal Feedlots:

[FEEDLOTS](#)

The Minnesota Pollution Control Agency (MPCA) tracks locations of animal feedlot facilities. The locations of animal feedlots provide information and context to support decisions on animal health, land use, and maintaining environmental quality.

Government Publication Date: Nov 25, 2021

Tier 2 Report:

[TIER 2](#)

A list of Tier 2 Facilities in Minnesota. This list is provided by Minnesota Department of Public Safety overseen by the Division of Homeland Security and Emergency Management.

Government Publication Date: Sep 14, 2022

Bulk Storage Permits:

[BULK STORAGE](#)

The Minnesota Department of Agriculture's Licensing Information System (LIS) lists individuals or companies who hold licenses, certificates and/or permits required by state law and regulated by the Department. This database only contains those LIS licenses related to anhydrous ammonia storage facilities and bulk pesticide/ fertilizer storage facilities.

Government Publication Date: Jan 31, 2023

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Subject: Phase I ESA, Dayton, MN
Attachments: Hennepin County Property Info..pdf

Hello,

Braun Intertec is conducting a Phase I environmental site assessment (ESA) on a parcel in Dayton, MN. The parcel ID for the Site is 3012022340001. An outline of the site and the Hennepin County property information has been attached to this email for your reference.

In order to fulfill the requirements of the site assessment, we need to contact you/City of Dayton. I understand that you may not be able to answer all the questions listed below however, any information would be greatly appreciated.

- 1) Do you have any records of any storage, spills, leaks of hazardous substances or petroleum products at the site?

- 2) Do you have record of any aboveground or underground storage tanks currently or previously located at the site? If previously, when removed? If currently, size and contents?

- 3) Do you have any record of any wells and/or septic systems currently or previously located at the address? If previously, when sealed or abandoned?

- 4) Is the site connected to municipal water and sewer utilities? If not currently, could the Site be connected in the future?

- 5) Do you have records pertaining to any buildings and/or structures located at the site? If so, year built?

- 6) Do you have records pertaining to the removal or demolition of structures previously located at the site? If so, when?

- 7) Do you have any records of dumping or landfilling at the site or the import of fill of unknown origin brought to the site?

8) Do you have record of any known environmental concerns in connection with the site?

Please reply to this email with any information the City of Dayton may have regarding the site.

Thank you very much,

Michael

J. Michael Carter
