

Melissa Homann

Please tightened rules to keep our ozone levels down. I moved to Albuquerque 8 years ago and loved walking in the foothills, but now i carry an inhaler because i now have asthma. Most recently i've had two severe asthma attacks because of "desert dust." Will i have to move? I certainly hope not. I am looking into buying an air purifier but they are costly. If you do not act i fear i will have to move but don't want to. I love walking in the foothills and seeing the mountains and beautiful sky.
