

## New Mexico Voices for Children

New Mexico Voices for Children urges the EIB and AQCB to adopt the Clean Car Standards for New Mexico as proposed by the NMED. These rules will help ensure cleaner air for New Mexico's children and families by reducing pollution-causing emissions in the transportation sector, and they will allow more New Mexican's the ability to purchase electric vehicles, saving them money at the gas pump. The science has made it clear how important it is for New Mexico to take action this year, as each new climate report shows how bold, urgent action is needed when it comes to reducing greenhouse gas emissions to best protect the health and well-being of children everywhere and for generations to come. Thankfully, New Mexico has demonstrated its commitment to combating climate change in recent years, and the next step in that fight is to adopt Clean Car Rules.
