

Stephanie Haan-Amato

To Whom it May Concern, Please adopt the proposed new Clean Car Standards ensuring that car dealers will be required to sell more low- and zero-emission cars. Transportation is one of the largest sources of greenhouse gas emissions in New Mexico, and our state is already feeling the effects of climate change. We're facing a serious water shortage, and this year's wildfires have had very large human and economic impacts. Additionally, I am an electric vehicle owner in southern New Mexico, and my options for vehicle charging are quite limited. It would be very helpful to me to have the increased opportunities for electric vehicle charging that will result from increased demand and US Department of Transportation funding. Thank you for your work for the people of New Mexico and for your consideration of the Clean Car Standards. Sincerely, Stephanie Haan-Amato, Las Cruces
