

## Do Good LLC

A New Mexican for over thirty years, I am dismayed that I cannot find either a plug-in hybrid vehicle or a full-on Electric Vehicle for purchase. I've been shopping for several weeks now, hoping to purchase a lower-priced EV, or even plug-in electric. I've contacted dealers in Roswell, Farmington, Las Cruces, Albuquerque Santa Fe and elsewhere to no avail. They will not even allow me to write a check then an there to order one! Most employees at New Mexico auto dealers do not even know their manufacturer advertises and sells EV's!!

Rather than buying on-line from an out of state dealer, I'm having to settle for a 52 mpg Toyota Camry LE Hybrid, instead of the 100 miles per gallon now advertised by manufacturers as available.

I am proud our state is moving to adopt clean car standards, and encourage you to adopt the proposal as is.

I appreciate your time and consideration!
