Re: Air Quality Permit Application for Roper Construction Inc. Alto Concrete Batch Plant

Dear Environment Improvement Board members,

Out of all the places we have been looking at as a retirement place for my husband and myself, we picked Alto, NM for its beautiful scenery, wildlife, wonderful mountain setting and crisp, fresh air. It was such a shock to hear about the concrete batch plant project, as this would totally disfigure and negatively affect this amazing area. This is also a big health concern for older persons, young children and people with lung conditions.

No claimed business profits could outweigh the risks to the health of residents and visitors such plant would create.

One wouldn't expect to find such a nuisance in a touristic and peaceful, pristine area.

Who would want to come and visit to experience air pollution, noise, truck traffic and such an eyesore along a scenic road?

Thank you for your kind consideration towards this issue of Alto concrete batch plant for the benefits of the community.

Best regards,

Sabine Dufis-Elizabe.
