

## Vicki Moutray

I strongly object to the construction of the Roper Construction Concrete plant being approved in the vicinity of Alto, Kokopelli, Outlaw, Rainmakers, the Spencer Theater, a church camp for children, a plant nursery, several golf courses, and RV parks; just to name a few. These developments are some of the very nicest in Lincoln County and the property values and quality of life could decline significantly due to the proximity of this proposed plant.

Most importantly, these areas are populated by a large majority of senior citizens who face natural high altitude challenges without additional unhealthy dust being emitted into the air. None of these residents could have imagined facing this type of threat to their health in their futures. My concern is for the many residents who will be effected by this unforeseen challenge in their choice of relocation from many areas of the US and Mexico and the resulting environmental air quality deterioration.

I ask that you please consider my concerns and that of many other residents and deny the appeal. The "concern for many" should weigh much heavier than a business which by nature pollutes the air and benefits a singular entity.

Thank you for your consideration and please deny this appeal.
