

Brian Helm

As an Alto resident with young children and as a survivor of cancer on my vocal cord and as an avid runner there are significant health concerns for myself and our family. We hike together, play golf together, and I've run miles and miles along Hwy 48 and 220 and the trails in the area. An area of great concern aside from health issues are the water use required for the plant in a state and area struggling greatly with limited water resources. We strongly oppose this plant and urge the Environmental Improvement Board to stand by the original decision and conviction to continue to make this a great area to live and enjoy outdoor activities
