

Debra Higdon

I am adamantly opposed to issuance of an Air Quality Permit to the proposed Roper Concrete Plant in Alto, NM. Not only has Mr. Roper continually misrepresented his intentions but he has not honestly represented the danger to our citizens, wildlife and environment from the sulfur dioxide, nitrogen oxide and carbon monoxide which he will be producing and spewing into our air. It is obscene that he has chosen to place this polluting operation in the middle of 11 residential neighborhoods, next to the White Mountain Wilderness and along the Billy the Kid Scenic Byway. Please do NOT agree with his appeal and stand with the citizens of Lincoln County in our opposition. Thank you.
