

## Ron m michelena DDS

Ladies and Gentlemen, I left a comment about the air quality concerns I have, about the batch plant last week. After listening to the hearing, I would like to address The Board. We are not talking about a small or unobtrusive project proposed by Mr. Roper. A project that has mounted the opposition that this one has must be considered for denial of application. This is a very pristine area that would be devastated by such a project. I wonder if Mr Louis Rose would like this plant built in his back yard in Santa Fe? I would think not. The hearings had an air of "lawyering". I hope common sense will rule the day. If the board members have ever been to Alto, you would realize, just how out of place this project would be. Please save our sanctuary. Thank you for your consideration.
