

## Mary Weaver

I am a long time resident of a home located less than ½ mile from this proposed project. I am very concerned about the impact of this batch plant on the air quality of the area and the long term effects of the many people who live nearby. It may also endanger the wildlife that lives in the area and in the White Mountain Wilderness which is only 1.1 mile from the proposed site. I will leave the more specific details that support these objections to the experts, but I do want to express my concern as a citizen of Lincoln County. I am also a local real estate broker, and am very concerned about the negative impact to property values in the area should this project move forward.

Sincerely,  
Mary Weaver
