

Denise Byrd

Mr. Roper has done an excellent job in presenting all the facts on his plant and we are in support of him having a business in the Alto area. We will not be able to attend the hearing, we did attend by watching his presentation to the Lincoln County Commissioners and know that he is following all the correct procedures for opening his plant and feel like he is planning on taking care and following proper guidelines to conduct a concrete plant. I am sorry that there are people opposing him but feel like he has followed the guidelines in opening this business.
