

Preston Stone

We are a nation of freedom that has been preserved by Americans placing themselves in harms way on foreign battlefields at the cost of death to live one's right to live as an American with rights to have their own business of choice given they follow the guidelines. The Roper concrete batch plant has met all requirements and passed all tests by NMED. For one single group of people to have the right to jeopardize this economic development and business that will benefit further growth of Lincoln County and New Mexico is un-American. The importance of the Roper concrete batch plant is justly important to Lincoln County and to New Mexico.
