

## Paul Pino

Since when does a conservative county want to crush businesses of hard working locals? Mr. Roper has jumped through the many hoops of fire created by the State of New Mexico, his project has been approved by the state of New Mexico, and now they have been shot out of the saddle by characters in their own county! Come on, we know that rural folks need to pretty much create their own jobs (to avoid having to move to the big cities), and here is Mr. Roper doing just that. We need to do everything we can to support him.
