

Joseph Parker

I am apposed because of the air quality for the elderly and wildlife. I am apposed because of the noise pollution will drive away the wildlife from the wilderness area. I am apposed because of the lack of water in our mountains with more people coming and new construction the demand will stress the water shed. It cannot hold a batch plant with hodgepodge water permits from the lower elevations valleys. I am apposed because of the initial environmental impact statement was used with data from Holloman Air Force base (a completely different environment). I am apposed because of the negative effects of light pollution on both fauna and flora. I am apposed because of the extra traffic of heavy cement trucks damaging the roads and scaring off the wildlife. I am apposed to Mr. Ropers unethical use of unrelatable data as his own.
