

William Deane

My wife and I are local year round residents in Alto. We are opposed to the construction of this concrete batch plant at the proposed location. We oppose this appeal for the following summary reasons:

- A) Proximity to residential housing,
- B) Proximity to the White Mountain Wilderness area,
- C) Flawed representation of air quality study on the quantity of particulate emissions and variance in local wind patterns to spread those emissions into residential areas and wilderness area,
- D) Sources and usage of scarce water resources to operate such an industrial facility,
- E) Lack of consideration for waste water discharge into local environment.

In summary, this is a stupid location for the type of industrial plant proposed.
Thank you for rejecting this appeal.
