PUBLIC COMMENTS SUBMITTED BY BARBARA SEVERANCE FOR THE OCT 18-20, 2022 HEARING

Per the testimony of NMED's expert employee for the Air Quality Permit; it was testified that NMED did not require Roper Construction provide information on how the company will acquire and utilize water to suppress the airborne pollutants the Alto Concrete Batch Plant will generate. This is a critical piece of evidence that needs to be provided by the Defendant to NMED and Alto CEP in order to be compliant with the suppression of pollutants. Technically, without this piece of evidence of how the generated pollutants will be controlled, the Air Quality Permit should continue to be denied.
