

Richard Hood

I agree that a new batch plant is needed. It is just not needed at this location. There are more appropriate places to place such an industrial complex than on a scenic byway, adjacent to several high end neighborhoods, the #1 voted private golf club in the state of NM, and close to the jewel Spence Theater. This would be a public noise nuisance, a visual catastrophe for the scenic byway, and would greatly diminish the appeal of the residential construction in those high end neighborhoods that are the growth corridor for the area. In addition, it is against the covenants of the property. We have to have strict code enforcement to protect the appeal of this area. Build it in an industrial area, such as Capitan, etc. Once it is built out, it will be there for eternity as an eyesore for every landowner and tourist/visitor to our great area.
