

## Tena Pitts

I own 5.6 acres in Ranches of Sonterra. I want to build a home there soon. I have Bronchiectasis, a lung condition that requires attention to air quality. I cannot live there if this plant is allowed to be established. I am extremely concerned about the water situation. We already have challenges with water levels as it is. This whole area will look and feel different if this is allowed. It will affect our property values. I feel certain it will also tear up the roads with all the concrete truck traffic. Please do not allow this to happen to us.
