

## April Mondragon

To Members of the New Mexico Water Quality Control Commission:

CCNS and HOPE are 2 of my local experts on LANL toxic waste issues and how it effects me, my family, and NM communities. I strongly disagree with the Hearing Officer's recommendation to the NM Water Quality Control Commission denying standing to CCNS and HOPE. Of all the individuals associated with Concerned Citizens for Nuclear Safety (CCNS) I rely on J. Gilbert Sanchez, Kathy Wanpovi Sanchez and Joni Arends to provide information for me to make informed decisions and to challenge DP-1132 for the 1963 old Radioactive Liquid Waste Treatment Facility and two new facilities that were permitted without the required public process for hazardous waste facilities. I am tired of government agencies that continue to allow the production of forever toxic waste, use these sacred lands and waters as dumping grounds, and continue to put me, my family and my community's health at risk. I am tired of people in my community getting cancer. I support standing for CCNS and HOPE in the DP-1132 petition for review before the NM Water Quality Control Commission. Thank you.
