

Susan Noel

I am a retiree of Los Alamos National Laboratory. I know from experience that the scientists at the Lab do not always have all the information they pretend to have. "Dazzle them with BS" was one of the sayings the scientists used when they didn't actually know what the consequences of their actions/experiments might have. Therefore, I support standing for CCNS and HOPE in the DP-1132 petition for review before the NM Water Quality Control Commission. I rely on CCNS and HOPE to provide information and opportunities to take action to challenge the issuance of DP-1132 before the NM Environment Department and the NM Water Quality Control Commission. We in New Mexico have enough toxins in our environment without introducing more.
