

Albuquerque, NM

November 14, 2023

Hello, My name is Ana Rios, I am a mother organizer with Together for Brothers and I want to express my support for 20.2.91, The Advanced Clean Cars and Trucks proposed standards.

Thank you, commissioners, for holding this opportunity to hear how communities in New Mexico will have positive impacts adopting The Advanced Clean Cars and Trucks standards.

Together for Brothers represents more than 50 low income and frontline families from areas like San Jose neighborhood, South Valley, Westgate and the International District in Albuquerque that have been affected by the transportation sector for many years.

I live less than two miles away from the junction of two interstate roads. I am part of the communities that are being directly impacted by 64 percent of NOx pollution, 58 percent of PM pollution, and 35 percent of transportation greenhouse gas emissions that medium and heavy-duty vehicles cause.

The Advanced Clean Cars and Trucks standards are an important step we can take now to better protect our families from the harmful air pollution that is impacting everyone, especially communities that live along transportation routes like mine.

Thank you for your time and consideration.

Ana Rios
