

Heather Wortman

I am very much in favor of the Advanced Clean Car and Trucks Rule proposed for NM. My family currently owns an all electric Tesla and a plug in hybrid Toyota Prius. We never use gas since the Prius gets 25 miles on an electric charge and I rarely drive farther than that. Climate change is an existential crisis for humanity and the scientists have been warning us for years about it. We need to change sooner rather than late or the planet will be destroyed. Vehicle emissions in the U.S. make up about 33% of all emissions. I also have solar panels on my house to reduce my own personal emissions even more.
