

Tye Terrell

I am a business man and my business requires me to travel the State of New Mexico. I'm a Licensed Ranch Real Estate Broker and have been in business for 51 Years. This business requires many miles driven every year (between 40,000 to 80,000 miles per Year). I have many days that I travel 500-600 miles a day in remote ranch areas of the State. Vehicles that have limited range in miles without a charge as I understand, just won't work for me!

Now I know the government and politicians don't consider economics, but that is just one more move toward "socialism" which as a tax paying citizen I don't like! We need to open our eyes and see what's going on in the real WORLD and see how these third world countries operate and ask Your self if that's where we're heading.
