

Donna Detweiler

I live near the airport and Kirtland Air Force Base just north of Gibson Boulevard, an area with lots of vehicular traffic. When i work with children in the garden at Kirtland Elementary and in the community garden a block north of there, we often smell exhaust fumes, which can't be good for young developing lungs or for the vegetables and fruits we are growing. Please enact strong regulations to reduce these hazards for the next generation and all life in the 505. Thx!
