

## Sean Kindred

I strongly support advanced clean cars 2 and advanced clean trucks. Reducing ICE emissions is key to gaining some measure of control over the impact of human industry on Earth's climate. Not just that, but EVs represent a technological advancement in transportation that's been decades in the making and one that is faced with well-funded opposition at all levels. It is critical that we take a proactive stance on climate issues here in NM and that's precisely what ACC2 and ACT will do.
