

## Gena Hoagland

The new advanced clean cars/truck rule would do nothing but drive business to out of state dealers there by hurting the economy in NM and devastate the new car/truck dealerships. We are a demand driven society and you can't force people to drive electric when it's not for them, encourage buyers don't restrict choices. If dealers don't have gas vehicles, NM residents will purchase from surrounding states and just use them here. I am completely against this rule.
