

Lynn Pickard

As a member of the public who is concerned about the environmental and economic effects of pollution and climate change, I strongly support these proposed rules, and I urge you not to capitulate to the fossil fuel industry or other special interests that might oppose these rules. We need to start prodding everyone to convert to electricity as a more sustainable source of energy, and these rules are a start. Change is always difficult, but if not now, when? Thank you for your consideration.
