

Marie Harding

I support the Advanced Clean Car and Truck Rules for New Mexico. New Mexico has a unique opportunity to be a totally green state, why isn't it happening? Now it's an oil state. With Climate Change providing increasing sunshine for Solar Power why not!! I own an electric car and charge it at home, I wish I were charging it with solar highly unfeasible with the politics of PNM and other oil based problems. NM needs to have multitudes of EV power stations for clean cars and trucks powered by multitudes of solar. Let's do it!
