

Leslie Padilla

I strongly support the adoption of the Advanced Clean Car 2 Rule and the Advanced Clean Trucks Rule. New Mexico has been at the forefront of advancing the adoption of renewable energy for over 15 years. Now, with even more evidence about the destructive effects of climate change, the state should continue to adopt measures that address the climate crisis. The transportation section is one of the largest greenhouse gas emitting sectors in the state. Electric vehicles make sense from many perspectives.

Thank you,

Leslie M. Padilla
