

# Mark Pringle

To the joint air quality boards,

Thank you for holding these hearings on clean car and truck standards that will improve the lives of everyone in our state. I urge the joint boards to adopt these stronger Advanced Clean Cars and Trucks standards for our state. In order to combat climate change, we need to shift to emissions-free vehicles. It takes time for people at all economic strata to adopt to new standards, and global temperatures have already increased far beyond what had expected. The sooner that we implement Advanced Clean Car standards, the better. Let our state be a leader when it comes to clean air and green technologies.

Thank you for taking the time to read my comment.
