

KENNETH GREEN

This will NOT work unless NM does a better job of getting the charging networks in place. There are very few charging stations around Santa Fe and those that are here are in very bad shape. Many are broken. It would be typical political bs to pass rules that are a burden on constituents. I will personally campaign against rules re: electric cars until the State supports electric car charging stations...and I own an electric car which I am certain MOST politicians do not. Hypocrits I say !
