

# Susan Homer

I support the Advanced Clean Car & Truck rules before you.

I have a son, and a 13-year-old granddaughter. I'm really worried about what their lives will be like as the inescapable effects of climate change affect the world. I'm in my 80's, so I'm not so worried for myself – I'll be gone before the worst of the changes are here.

But while I'm still alive, I would like to do what I can to alleviate the effects of climate change, and I understand that one of the most impactful things I can do is to stop adding carbon emissions to our atmosphere. I could drive an electric vehicle. And I understand that one might even be affordable by someone like me, what with costs coming down and tax credits.

But EVs are not so easily found here in New Mexico. So I'm here to ask you to approve the rules now under consideration, as soon as possible, not just for the benefit of my family, but for the benefit of all of us. Thank you.
