

## Kara Siebers

Hello. I respectfully BEG you NOT to approve this or move forward. I am a recent transplant from California, and I left for a reason. Many of my friends and family are considering the same. We love it here, as it is such a relief to escape the overbearing laws and taxes that make CA unliveable and suffocating. By not following their lead (CA), I believe that this state would benefit greatly, in the end, from the influx of young professionals in search of a beautiful and less constricting place to live.

Thank you for listening.
