

Terry Gow

It really disturbs me and my family that we were not notified about the transfer dump station that they are trying to put in the area we live in. It's bad enough we have so many junk yards that are spilling the fluids in our ground, recycling plants that are catching on fire and the trash coming out of them. As if the fuel station on desert road isn't enough and all the tankers that flood that street isn't enough. We have enough trash in our neighborhood with out putting a transfer station and more trash belonging to other people I think NOT!!! We are sick of our neighborhood looking like the dump. STOP STOP STOP ALREADY!!!!
