

## Holly Dietz

I live in the area and I have several concerns. One the roads, if trucks get diverted onto Prosperity, it is already a mess and it's a neighborhood with kids .

Two that area already has its share of problems now we are going to add loose trash from all the county's that will litter the area . Let other county's deal with their trash why add this an already burdened area !

Give the property owner some incentive to do something else with their property ! The air quality is horrible and now we are going to add trash to an already stressed area .

On top of this with the recent fire and the water damage that was caused by the fire trucks to the surrounding businesses is it wise to put another business that can easily catch fire without addressing the infrastructure issues first !
