

## Kim Ward

I strongly urge the NMED and BernCo to deny permitting for a transfer station on Broadway. The Mountain View neighborhood is disproportionately impacted by existing industry with a long history of poor air quality, water quality, etc. We don't want or need the traffic, noise and other hazards the 400 trucks per day would most certainly bring. There is an elementary school and agricultural lands very near to the proposed site and the health and well being of our children and the legacy of the land needs to be taken into consideration. The safety of the residents of the Mountain View Community needs to be considered. South Broadway should not be a dumping ground at all, and certainly not for trash being brought in from four other counties.  
Do Not Let This Project Happen.
