

## Kim Romero

I've been a resident in the south valley for 40+ years. There is a lot of new businesses taking over rural land in our areas. That equals more pollution from vehicles and from those businesses as well. We do not need or want this Transfer Station here! The area being looked at has a lot of residential properties and enough businesses now. There is a solid waste company already in that area and that smells bad enough & adds pollution in the area. Please do not allow this transfer station to come into the proposed area. Put it elsewhere, try the west mesa south of pajarito road.
