R Guzman

As a resident within 1 mile of this proposed facility, my family and I STRONGLY DISAPPROVE of this application.

The Mountain View community is and has already been a dumping ground for hazardous and harmful waste, ground and air pollutants. We do NOT need another dump in our community.

Mountain View has been taken advantage of by out-of-state commercial and oil businesses, and even our own City and County have continued to burden us with the city's wastewater and salvage yards, we already have to smell odor every night when we're trying to relax and garden in our backyard. Sadly, our community has been desensitized to the environmental abuse and allows more than they should.
Where is the proposed facility wastewater runoff going to drain? Back into our already stinky, dry, Rio Grande that only has sewer river water running south of the sewer plant?
What about how dangerous Broadway already is while driving? No center lane, no entry roads or pull-off lanes? Loaded oil tankers going 80 mph? And we need to address our already crappy roads that damage our vehicles while driving, Prosperity as an example. Go ahead and give it a drive to see. This facility will lead to more damaged roads and trash all over as haulers take side roads due to traffic and lose trash while hauling.
Mountain View has had enough damage as a dumping ground for the City's waste and fecal matter. We don't need other counties' waste coming here too. This only has benefits to others, and no advantages for Mountain View, it would only harm to our community.
What an insult to the community to even propose a dump. I would like to see the county support small businesses and locals within our community succeed with their business and endeavors rather than wasting time on applications such as this dump "transfer station".
The garbage trucks could drive six more minutes to Montessa and dump there. Let's not put more physical health and mental strain on our community for SIX more minutes of driving to the existing dump "convenience center".
The County does not have an odor policy for stink, so they would get away with stinking it up even more than the community already has to endure. We would not even be able to complain about odor, so let's not create another burden to our community. How about UWS find another location by their home to put this facility, not ours.
Thank you for your time in the matter.
Rebecca
