

S. SANCHEZ

I AM IN OPPOSITION OF THE BROADWAY TRANSFER STATION!! The Mountain View community has suffered years of being overburdened w/large trucks carelessly using residential roads as shortcuts through the community and ongoing issues w/contaminated water, low air quality, fires that spill plumes of smoke that result in air quality warnings and noise pollution. Permitting this action will only further burden our community. Not to mention the already congested traffic and dangerous driving situations we have to face.

THE community has consistently fought for our right to clean air, water, and quality of life yet year after year, we have to continue to oppose undesirable businesses that continue to threaten of the quality we're trying to maintain and to discontinue the constant reliance on our community to endure the businesses whose only contribution to the community is negative. Why is Mountain View community the consistent choice for these undesirable businesses? There are no other locations available? Unbelievable. Please deny this permit to further abuse and contaminate the Mountain View community.
