

Andrea Medina

To Whom it may concern,

As a lifelong Mountain View resident I am vehemently opposed to the proposed transfer station.

Our neighborhood is surrounded by pollution and noise from the base, the surrounding commercial and industrial companies, and the already heavy traffic.

I personally have been involved in an auto accident with a commercial truck driver. Bringing more commercial/industrial traffic into this neighborhood would be disastrous for our community.

The added noise and environmental pollution is not something our community can absorb in an already overly saturated environment.

Please kindly consider us, the residents of the Mountain View community, our families, and the future generations before making a decision.
