

Karen Turley-Corbett

Again, the dignity and humanity of the residents of those who live along Broadway and in the adjacent Mountain View community are being disregarded, sold out. Our neighborhood does not have the resources to present much of a fight against the increased traffic and concomitant pollution that will be the result of a new transfer station on Broadway. (Which Google presents as a done deal.) The new Love's with the increased diesel traffic is bad enough. Once part of the green belt south of the city, we are being increasingly industrialized with little regard for the health of people who have kept our part of the south valley alive. that an increase of 400 hundred trucks a day with the garbage of 4 counties would be added to the burden of traffic and pollution we already bear is reprehensible and I plead that a more consideration is given to an alternative site.
