

Pamela Jacquez

To Whom It May Concern,

I am writing to formally oppose the proposed waste transfer station near our neighborhood. Our community has already carried more than its fair share of environmental and industrial burdens for years. We currently live in an area heavily impacted by industrial activity, ongoing air pollution, and constant exposure to emissions and noise from the nearby train depot. Adding a waste transfer station would only worsen the quality of life and health risks for the families who live here.

Many residents in this area are already concerned about respiratory issues, air quality, traffic, odors, noise pollution, and the long-term environmental impact associated with industrial expansion. It is deeply concerning that yet another potentially harmful facility is being considered in a community that is already overburdened.

Our neighborhood deserves investment, protection, and healthier living conditions — not additional industrial projects that further degrade our environment and property values. We strongly urge the county to reject this proposal and consider the cumulative impact this project would have on the residents who already bear the weight of surrounding industrial operations.

Please listen to the voices of the community members who live here every day and understand that we are insisting this project not move forward.

Thank you for your time and consideration.

Sincerely,

Pamela and Steve Jacquez
