

## Cassandra Reid

Mountainview is a community which is already overburdened by toxic industry. From levels of nitrates being too high and causing a baby to nearly die in the 1980's, to the Superfund site along 2nd St. just north of Rio Bravo created by dipping railroad ties in toxic chemicals, to the trains carrying tanks of chlorine that linger in Mountainview, to plywood and asphalt and chemical production, this neighborhood has carried far, far more than its fair share of polluting industries over the past 5 decades. Please do not site a transfer station in this community. It's simply not fair. Thank you.
