

Kenneth Delapp

I understand the need for infrastructure to deal with trash, and I know that that infrastructure must go somewhere. But our neighborhood already sees way too much heavy truck traffic on 2nd street, and driving on Broadway in anything short of an armored vehicle is downright scary. This area is already overwhelmed with traffic, dust, trash and noise. I am against any more development on Broadway that brings more heavy truck traffic--especially at the volume that the UWS facility would.
