

Lin Craft

I want to point out reasons NOT to allow more dumping in our South valley neighborhood:

Traffic Nightmare: This permit would bring over 400 trash trucks to Broadway every single day. If there's an accident or a fire (like the fireball we just saw this weekend), those massive semis will be diverted onto our residential roads like Prosperity, Desert Road, and Second Street. Our quiet streets aren't built for that.

It's Not Even Our Trash: We are downwind from this station. We'll be breathing air pollution from the fumes and the garbage of four other counties. Why should Mountain View suffer for everyone else's waste?

Protect Our Children: Mountain View Elementary is less than a mile away. Our kids deserve to grow up without breathing in industrial pollution. Many of our families have been here for generations—let's make sure the next generation can stay here too.
