Roman Lucero

Here we go again! Nobody paya attention to the South Valley, especially the Mountain View community unless they want to place everyone's unwanted junk in our area. This is borne out by what has been brought into our area because it was blight in other communities. eg, when the sewer plant was causing concern in the prior location, the answer was; Don't worry about it, we will fix it. So we have a sewer plant that collects everyone's sewage from through the city except ours. When junk yards became an unwanted commodity in other neighborhoods, again, don't worry. Now Broadway is a continuous junk yard from Gibson to the Isleta Pueblo. When residents complained about aircraft noise on the North-South runway, again, don't worry. Now we have aircraft noise pollution as aircraft prepare to land on the newly created SW-NE runway. We could go on and on citing other instances of blatant disrespect for residents of the Mountain View Community and this proposed Transfer Station that in no way benefits us is just another example. ENOUGH!!!
