The dredge and fill rule is basically blank, it's not ready for a public hearing because it's not yet written. Please consider holding off on this piece until after the NMPDES, which is much more well developed, because as currently written the public is not on notice of what will be covered or when, or to whom the rule will apply. Please do not write this rule during the hearing, doing so will deprive the public of a meaningful chance to comment. Write the rule and set it for a separate hearing so that the public has a fair chance to participate.
