

Tina Nelson

I oppose project Jupiter poisoning our community resources. Las Cruces does not need or want a data center. I don't believe or agree with the arrest and suppression of community leader voices at the BOCC. This will raise energy prices for our community and pollute our water with our tax dollars. Elected officials must do better and stand with the people that gave them their platform. I am opposed to this project, do not develop it. You are ruining our town by selling out.
